SKILLS

Data Engineering: Apache Airflow, Airbyte, Mage AI, ETL/ELT Pipelines, PostgreSQL, AWS (S3, EC2, ECR, Lambda, Glue, Athena), Docker, Data Modelling, Pandas, NumPy

Machine Learning & AI: PyTorch, TensorFlow, Scikit-learn, Transformers, Computer Vision, RAG, Fine Tuning, Vector Search (PGvector, chromaDB, Faiss, qdrant)

Programming & Frameworks: Python, SQL, Go, Java, C++, Git, Linux, FastAPI, Nodejs, React

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Sep 2022 – May 2026

Sri Venkateswara College of Engineering, **CGPA: 8.1/10**

WORK EXPERIENCE

Third I

Jul 2025 - Present

AI Data Engineer Intern

- Engineered 4 ETL pipelines using **Airbyte, Mage AI, Python, and PostgreSQL** and **AWS S3** processing over **100K advertising records** daily from multiple marketing APIs
- Designed **medallion based data models** for marketing analytics, streamlining reporting and downstream analysis workflows
- Enhanced analytical query efficiency by **20%** by using **tuning schemas** and implementing **indexing strategies**.
- Collaborated with **stakeholders** to translate **reporting requirements** into **scalable data pipelines**, supporting marketing performance analysis and decision-making

Hyundai Motors

Jan 2023 - Feb 2023

AI Developer Intern

- Established an **end-to-end data pipeline** for **10K+ image samples**, supporting preprocessing, augmentation, and feature extraction for computer vision models
- Developed a **Dockerized machine learning workflow** with a Tkinter-based interface, supporting dataset management, training orchestration, and metric visualisation
- Increased **CNN** validation accuracy from **80% to 85%** by optimising **model hyperparameters** and applying **data augmentation techniques**

PROJECTS

AI Powered Image search and Asset management, Client Product

[Link](#)

May 2026

Technologies: React, FastAPI, PostgreSQL, AWS S3, Gemini MultiModel Embeddings

- Created a **semantic image search platform** for a client, enabling **natural language retrieval** across 1K+ production creative images using **Gemini multimodal embeddings and Postgres**.
- Implemented **hierarchical folder-based** Image organization for the **search filtering** feature.
- Built using **FastAPI** as backend integrated with **AWS S3 bucket and Celery** to manage image upload, metadata management and embedding generation workflow.
- Built a **React-based frontend UI** for image search, asset management and carousel generation workflows.

Flight Data Analytics, Data Engineering and Analytics Stack

[Link](#)

Apr 2026

Technologies: Python, Streamlit, Airflow, Postgres, MinIO

- Developed scalable **Flight Data ETL pipelines** using Apache Airflow, processing **10K+ flight records** with automated scheduling, reducing manual intervention and improving pipeline reliability.
- Created a hybrid **storage architecture** with MinIO and PostgreSQL, managing datasets while improving **query performance by 45%** and enabling efficient downstream processing.
- Constructed interactive **analytics dashboards** using Streamlit and SQL, delivering near real-time insights through **15+ visualizations** and reducing report generation time from hours to minutes.

CERTIFICATIONS

PyTorch and Deep Learning for Decision Makers | Linux Foundation | [Link](#)

Python Gold Badge and SQL Intermediate Certification | HackerRank | [Link](#)

Trade of Tools: Linux And SQL | Google | [Link](#)

Google Cybersecurity Professional Certificate | Google | [Link](#)
